# Nursing Services

## We provide...

- Comprehensive care management
- Medication management
- Client advocacy
- Living environment planning and transition assistance
- Assistance for out-of-town families with their elders in Portland

## Your Personal Healthcare Representative

## Comprehensive...

Northwest Senior Management RNs can provide complete health management for the elderly or disabled. We arrange medical appointments and provide knowledgeable and experienced representation with the related medical professionals.

## Medication Management...

We work with physicians and pharmacies to help our clients with their medication requirements. New medication therapies can sometimes be difficult or confusing, but our RN staff can manage the complete process from doctor's orders to actual administration.

## Advocacy...

Whether a family member or guardian is here or across the country our nursing staff can serve as the healthcare advocate. We ensure that our clients get the best care possible and we communicate with the family or guardian regarding any issues affecting the wellbeing of our clients.

## Planning...

Our RN Care Managers set up care plans to provide for current conditions and to anticipate changes that come as part of a progressive disease process or as a part of natural aging. Proactive care planning ensures the best quality of life possible.

## Complex Care...

We are able to meet the care needs of difficult or complex cases. This individually designed care allows our clients to remain comfortably in their own homes. We are well experienced in:

- Spinal cord injuries
- Diabetic care
- Parkinson's disease
- Alzheimer's-type diseases
- Multiple Sclerosis
- Advancing age
- End of life coordinated care
